Career Summary

Senior Frontend Engineer with 7+ years of experience building web and mobile applications with React, React Native, Next.js, and TypeScript. Experienced in cross-platform development, reusable UI architecture, performance optimization, API integration, and production releases. Led engineers and collaborated with product and business teams to deliver user-focused features.

Experience

SuperMileage Mar 2026 – Aug 2026
Senior Software Engineer *Bangalore, India*

- Built SuperMileage Hub from scratch using Next.js, integrating BPCL and IOCL workflows and supporting growth in monthly fuel transactions from INR 1.2 crore to INR 10 crore.
- Owned frontend delivery and built an admin dashboard with daily and monthly partner fuel-consumption graphs; reviewed code, documented technical decisions, and mentored a junior engineer.
- Built EFR Journey for production issue tracing, connected Firebase Crashlytics alerts to Slack, and implemented Remote Config force-update controls for mobile releases.
- Integrated Firebase OTP authentication and HDFC payments, reducing partner onboarding from a full day to under 30 minutes; automated access and payment flows eliminated 50+ daily support tickets.

Nityo Infotech (Client: NTUC) Jul. 2024 – Oct. 2025
Senior Software Engineer *Singapore, Remote*

- Led the Parent app's React Native migration from 0.60.x to 0.71.x and owned frontend architecture and REST integrations for childcare, attendance, classroom operations, and parent updates.
- Reduced redundant image requests by 95% with a six-hour retry cooldown that removed repeated fetches during 30-second refreshes
- Delivered features across Parent, Guardian, and Staff apps, using feature flags and staged store rollouts to manage release risk.
- Resolved 20+ defects in the first two weeks and contributed to code reviews and requirements discussions across the Vision and Ironman teams.

RStack Solutions Pvt Ltd Nov. 2022 – Feb. 2024
Lead Software Engineer / Senior Consultant *Bangalore, India*

- Led four engineers across two products, providing technical guidance, mentoring, and code reviews.
- Owned the right-to-left adaptation of the Ferns N Petals interface for its UAE launch.
- Integrated MoEngage campaigns that contributed to a 25% increase in orders.
- Built Bhima Health Desk's member portal across web and React Native, enabling families to submit and view claims, book doctors, and access insurance benefits.

Recro (Clients: Mastree / Unacademy, Swiggy) Dec. 2020 – Oct. 2022
Software Engineer *Bangalore, India*

- Independently designed and built Swiggy's restaurant-partner payout experience as a shared React Native and web monorepo package, partnering with Finance from requirements through delivery.
- Added monthly payout history, infinite scrolling, and date filters to an experience used by more than 90% of restaurants.
- Built Mastree's educational reels feature and helped deliver live classrooms using Agora audio/video streaming and WebSockets.
- Ran post-launch A/B tests for reels and classrooms and managed staged releases through the App Store, Play Store, and Microsoft App Center.

Memorang Inc May. 2019 – Nov. 2020
Software Engineer *Chennai, India*

- Built features for the USMLE preparation app's MVP, including study packs, spaced repetition, and mastery scores.
- Created reusable UI components using higher-order components and white-label theming, reducing new-feature time-to-market by 25%; added unit tests to catch regressions.

Technical Skills

Frontend & Mobile: JavaScript, TypeScript, React.js, React Native, Next.js, HTML & CSS
Architecture & Performance: Frontend architecture, reusable components, shared monorepo packages, Performance optimization (Code splitting, lazy loading)
State Management & UI: Redux Toolkit, React Query, Tailwind CSS, shadcn/ui, Radix UI, React Hook Form, Zod
API & Real-Time: REST APIs, GraphQL, gRPC, WebSockets, Agora audio/video streaming
Testing, Observability & Delivery: Jest, Playwright, Maestro, GitHub Actions, Firebase Crashlytics, Sentry, Firebase Remote Config, App Center
Backend Exposure: Java, Spring Boot, SQL

Education

Anna University Chennai, TN
Integrated Masters in Computer Science *Aug. 2014 – Apr. 2019*

Projects

GetKynd | *Next.js, Firebase, Statsig* Oct 2026 – Present

- Built a full-stack web application with a React frontend and Firebase backend.
- Implemented Firebase Authentication so users can log in and join the waitlist.
- Integrated Statsig to control feature releases through feature flags.

Bujju | *Swift UI, Agora SDK* Sep 2026 – Oct 2026

- Built a macOS voice-agent app with a floating blob interface.
- Integrated the Agora SDK to support voice interactions.
- Configured voice models in Agora Studio for different languages.

Community & Speaking

- Co-lead the Bengaluru chapter of She Builds, supporting the local builder community.
- Organized Microsoft's Tame the Code event.
- Presented a conference talk on building AI agents with Mastra.
- Built a Slack-integrated crisis agent at the OpenAI Codex Hackathon to alert teams about real-time production issues.
- Built Entire Echo, a voice-interactive CLI, at the Bengaluru Tech Week Buildathon.
- Attended hands-on workshops on building WebMCPs and AI agents.
