

SUMMARY

Senior Software Engineer with 7+ years of experience building web and mobile products, specializing in React and React Native. Strong background in frontend architecture, performance optimization, cross-platform development, and technical decision-making, with experience collaborating directly with CTOs, CEOs, Staff Engineers, and engineering leaders.

SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Java, SQL
- **Frontend:** React, React Native, Expo, Next.js, Redux, React Query, Redux Toolkit
- **Backend:** Spring Boot, REST APIs
- **Testing:** Jest, Playwright, Maestro, Unit Testing, Integration Testing
- **CI/CD & Monitoring:** GitHub Actions, Synthetic Monitoring, Firebase Crashlytics, Sentry
- **Tools:** Git, Xcode, Android Studio, Google Play Console, App Store Connect, Expo OTA, Bitrise
- **Practices:** Agile/Scrum, Modular & Scalable Architecture, Design Patterns, Cross-Platform Deployment, Native Module Integration, AI-Assisted Development (Claude, Chat GPT, GitHub Copilot), Mentoring

EXPERIENCE

SuperMileage <i>Senior Software Engineer</i>	Mar 2026 – Present <i>Bangalore, India</i>
◦ Logistics Partner Platform: Independently gathered requirements, designed, built, and released an end-to-end Next.js product serving logistics partners and fleet owners. ◦ EFR Journey: Researched and introduced a request-lifecycle view surfacing the full event history of individual requests, cutting the operations team’s tracing effort when OMC technical support was unavailable. ◦ LP Code: Built the backend API for a unique identifier used to address individual logistics partners. ◦ Payments: Integrated HDFC Bank payment gateway APIs across web and mobile, enabling secure in-app transactions. ◦ Authentication: Integrated Firebase OTP authentication across web and mobile applications. ◦ Release Engineering: Implemented React Native Expo force-update and OTA update capabilities; owned internal beta testing and release workflows across Google Play Store and Apple App Store. ◦ CI Pipeline: Built GitHub Actions workflows enforcing build and test pass criteria on every pull request, blocking regressions before merge. ◦ Monitoring & Reliability: Established synthetic end-to-end monitoring for web and mobile using Playwright and Maestro, running automated production checks every 30 minutes, and added Firebase Crashlytics for crash observability.	
Nityo Infotech (Client: NTUC) <i>Senior Software Engineer</i>	Jul 2024 – Oct 2025 <i>Remote</i>
◦ React Native Migration: Led the migration of a production application from React Native 0.60.x to 0.71.x across Android and iOS — upgrading dependency libraries, replacing deprecated packages with maintained alternatives, and resolving upgrade failures to restore stable performance on both platforms. ◦ Infant Care: Delivered the infant daycare logging feature across NTUC’s staff and parent applications, letting childcare specialists record drop-off, feeds, sleep, diaper changes, and baths for parents to view in near real time; integrated the supporting REST APIs and shaped the UX so both non-technical audiences could use it quickly. ◦ Image Caching: Rebuilt the caching layer with resilient invalidation, cutting redundant image fetches by approximately 40%, improving render performance and significantly reducing CDN cost. ◦ Backlog Reduction: Closed 20+ long-standing backlog defects within the first 40 days and was moved onto a higher-priority delivery team as a result. ◦ iOS Build Pipeline: Resolved complex CocoaPods configuration conflicts, reducing build errors and developer downtime. ◦ Code Review: Reviewed pull requests across the team to hold code quality, and tracked incoming feature work to keep product context current.	

RStack Solutions Pvt Ltd

Lead Software Engineer

Nov 2022 – Feb 2024

Bangalore, India

- **Healthcare Platform:** Architected a member-services application, integrating patient management systems end to end.
- **Internationalization:** Delivered **RTL** adaptations for UAE-market applications, improving regional accessibility and compliance by **30%**.
- **Engineering Standards:** Drove standardization of solution approaches across projects, improving interoperability and eliminating duplicated engineering effort.
- **Growth Analytics:** Integrated **MoEngage** to target marketing campaigns, improving campaign effectiveness by **25%**.
- **Stability:** Led bug triage and performance optimization initiatives, measurably improving application stability.

Recro

Software Engineer

Client: Mastree (acquired by Unacademy)

Dec 2020 – Oct 2022

Bangalore, India

Ed-Tech — Consumer Mobile App

- **Learning Feed:** Core member of the mobile app team; built an Instagram Reels-style short-video feed letting children publish what they had learned.
- **Video Competitions:** Shipped a competition feature where children entered by sharing videos, lifting learner engagement by **30%**.
- **Release Management:** Owned feature releases through **Microsoft App Center** OTA updates and staged Google Play Store rollouts.
- **Crash Monitoring:** Monitored **Firebase Crashlytics** continuously and turned around production fixes on short cycles.

Client: Swiggy

Food Delivery — Restaurant Partner App

- **Payouts:** Implemented the payouts section giving restaurant partners a detailed month-by-month settlement history.
- **Growth & Ads:** Built the growth and ads flow through which restaurants publish advertising to Swiggy users, including the ad support-ticket journey.
- **Bug Smash:** Ran bug smash sessions on the vendor-side order-taking app, identifying and fixing defects across live order flows.

Memorang Inc

Software Engineer

May 2019 – Nov 2020

Remote

- **USMLE Study Packs:** Core member of the team that built the MVP mobile application for medical students preparing for board exams.
- **Spaced Repetition:** Implemented a spaced-repetition learning feature that helps students retain material and generates a mastery score for each study pack.
- **White-Label Theming:** Built themeable UI components supporting an in-house white-label app theme; reusable Higher-Order Components cut time-to-market for new features by **25%**.
- **UI Test Coverage:** Wrote unit tests for mobile app UI components, reducing post-release defects.

EDUCATION

Anna University

Integrated Masters in Computer Science

Aug 2014 – Apr 2019

Tamil Nadu, India

- Thesis: *Similarities Prediction for Leisure Activities* — a 4-month machine learning project modeling user behavior and preferences.
- Organised Microsoft's Tame The Code Event for Techofest cultural event.

SPEAKING & COMMUNITY

- Built prototypes with **Mastra AI** and delivered a conference talk positioning it as a developer-friendly agent framework.
- Served as a panel member for the JS Lovers 10th anniversary event.
- Conducted a workshop series for **100+ students** and a fireside chat at TinkerHub on tech careers for women from underprivileged communities.
