

GAYATHRI PERUMAL

Immediate Joiner

Bengaluru, India | gayathrithedev@gmail.com | [linkedin.com/in/gayathrithedev](https://www.linkedin.com/in/gayathrithedev)

Career Summary

Senior Software Engineer with 7 years of experience building and scaling reliable frontend products across web and mobile. Specializes in React, React Native, Next.js, and TypeScript, with hands-on ownership of frontend architecture, real-time experiences, reusable cross-platform systems, performance, testing, and production reliability. Has built products from the ground up, led engineers, and partnered directly with product, business, and engineering stakeholders to take complex workflows from requirements through production.

Highlights

- Built SuperMileage Hub from scratch in Next.js, supporting growth in monthly fuel transaction value from **INR 1.2 crore to INR 10 crore**.
- Helped deliver Mastree's 1:1 and 4:1 live classrooms using Agora audio/video streaming and WebSockets.
- Designed Swiggy's shared React Native and web payout experience, used by **more than 90% of restaurants**.
- Led a four-engineer team across two products, combining hands-on delivery, technical guidance, code review, and mentoring.

Experience

SuperMileage

Mar 2026 – Aug 2026

Senior Software Engineer

Bengaluru, India

- Owned the frontend ecosystem and built admin dashboard with partner fuel-consumption graphs across daily, monthly; reviewed code, documented decisions, and mentored a junior engineer.
- Independently launched the fleet fuel-request platform, scaling **monthly fuel transaction value from INR 1.2 crore to INR 10 crore** across BPCL and IOCL integrations.
- Built EFR Journey for production issue tracing and routed Firebase Crashlytics alerts to Slack webhooks; used Firebase Remote Config for force-update controls and safer mobile releases.
- Integrated Firebase OTP authentication and the HDFC payment gateway, cutting partner onboarding from **a full day to under 30 minutes**; automated access and payment flows eliminated **50+ support tickets/day**.

Nityo Infotech (Client: NTUC)

Jul 2024 – Oct 2025

Senior Software Engineer

Singapore, Remote

- Delivered production features across parent, guardian, and staff apps for Singapore childcare and school operations, using feature flags and staged store rollouts to manage release risk.
- Led the React Native parent-app migration from **0.60.x to 0.71.x** and owned frontend architecture and REST integrations for infant care, attendance, classroom operations, and parent updates.
- Reduced redundant image requests by **95%** with a six-hour retry cooldown that removed repeated fetches during 30-second refreshes.
- Resolved **20+ defects** in the first two weeks; later reviewed code and joined business and project requirement discussions across the Vision and Ironman teams.

RStack Solutions Pvt Ltd

Nov 2022 – Feb 2024

Lead Software Engineer / Senior Consultant

Bengaluru, India

- Led a four-engineer team across two products, mentoring engineers, guiding technical execution, reviewing work, and keeping delivery on track.
- Owned Ferns N Petals' full right-to-left adaptation for UAE users, delivering a localized interface across the product for the regional launch.
- Integrated MoEngage campaigns that contributed to a **25% increase in orders**.
- Built Bhima Health Desk's member portal across web and React Native, enabling families to file and view claims, book doctors, and access insurance benefits.

Recro (Clients: Mastree / Unacademy, Swiggy)

Dec 2020 – Oct 2022

Software Engineer

Bengaluru, India

- Built Mastree's educational reels feature and helped deliver 1:1 and 4:1 live classrooms using Agora audio/video streaming and WebSockets.
- Ran post-launch A/B tests for the reels and live-classroom experiences; managed staged releases through App Store, Play Store, and Microsoft App Center.
- Independently designed and built Swiggy's restaurant-partner payout experience as a shared monorepo package for React Native and web, partnering directly with Finance from requirements through delivery.
- Added monthly payout history, infinite scrolling, and date filters; the experience was used by **more than 90% of restaurants**.

- Core engineer on the MVP mobile app for medical students preparing for USMLE, shipping study-pack, spaced-repetition, and mastery-score features from the ground up.
- Built reusable UI components with higher-order components and white-label theming, cutting time-to-market for new features by **25%**; added unit tests to catch regressions before release.

Technical Skills

Frontend & Mobile: JavaScript, TypeScript, React, Next.js, Next.js App Router, React Native, Tailwind CSS, shadcn/ui, Radix UI, React Hook Form, Zod, Redux Toolkit, React Query

Architecture & Real-Time: Frontend architecture, reusable components, shared monorepo packages, WebSockets, Agora audio/video streaming, REST APIs

Testing, Observability & Delivery: Jest, Playwright, Maestro, Firebase Crashlytics, Sentry, Firebase Remote Config, GitHub Actions, App Center, App Store Connect, Google Play Console

Backend Exposure: Java, Spring Boot, SQL

Education

Anna University, College of Engineering Guindy
Integrated Master's in Computer Science

2019
Chennai, India

Selected Speaking & Community

- Conference speaker on Mastra AI; panelist at JS Lovers' 10th anniversary; led workshops for 100+ students.
- Built Entire Echo independently, a voice-interactive CLI that reads per-commit requirement checks aloud and supports developers who cannot rely entirely on a screen, with visually impaired developers in mind.
